

Regional training course on integrating nuclear techniques for soil, nutrient, and water management

Hosted by

The Government of North Macedonia

through the

**Faculty of Agricultural Sciences and Food of Ss. Cyril and Methodius
University**

Skopje, North Macedonia

8-12 June 2026

Ref. No.: TN-RER5030-2601856

Information Sheet

Purpose

The purpose of this event is to train the participants in isotopic, nuclear, and related techniques for soil, nutrient, and water management.

Working Language(s)

The working language(s) of the event will be English.

Deadline for Nominations

Nominations received after 17 April 2026 will not be considered.

Project Background

This regional project brings together Member States across Europe and Central Asia to strengthen food security, agricultural sustainability, and climate resilience through the strategic application of nuclear and isotopic technologies. Addressing shared challenges such as climate change, soil degradation, and food safety risks, the initiative promotes science-based solutions aligned with national priorities, the Sustainable Development Goals, and the European Green Deal. Focusing on crop production, agriculture water and soil management, livestock production, and food safety, the project enhances technical capacities, supports resilient agrifood systems, and improves the quality and safety of food production through coordinated capacity building, laboratory strengthening, and regional cooperation.

Scope and Nature

This regional training course provides theoretical and practical knowledge on the use of isotopic, nuclear, and related techniques in agricultural management. It addresses key challenges such as declining soil fertility, soil acidity, low crop productivity, inefficient nutrient and water use, and the measurement of greenhouse gas (GHG) emissions, while offering practical guidance on climate-resilient soil, nutrient, and water management.

Participation

The event is open to up to 35 participants with qualification/experience corresponding to the requirements described under “Participants’ Qualifications and Experience” from the Member States participating in the TC Project RER5030.

Participants’ Qualifications and Experience

The nominated participants should represent authorities and organisations in charge of agricultural or environmental research, and they should have education in earth sciences, agricultural sciences or life sciences related to agriculture.

Application Procedure

Candidates wishing to apply for this event should follow the steps below:

1. Access the InTouch+ home page (<https://intouchplus.iaea.org>) using the candidate’s existing Nucleus username and password. If the candidate is not a registered Nucleus user, she/he must create a Nucleus account (<https://websso.iaea.org/IM/UserRegistrationPage.aspx>) before proceeding with the event application process below.
2. On the InTouch + platform, the candidate must:
 - a. Finalize or update her/his personal details, provide sufficient information to establish the required qualifications regarding education, language skills and work experience (‘Profile’ tab) and upload relevant supporting documents.
 - b. Download and complete the [Designation of Beneficiary and Emergency Contact Form](#), and upload to InTouch+ (‘Profile’ tab under the personal section) specifying the document name. If already provided, kindly discard this step; and

- c. Search for the relevant technical cooperation event (EVT2601856) under the ‘My Eligible Events’ tab, answer the mandatory questions and lastly submit the application to the required authority.

NOTE: Completed applications need to be approved by the relevant national authority, i.e. the National Liaison Office, and submitted to the IAEA through the established official channels by the provided designation deadline.

For additional support on how to apply for an event, please refer to the [InTouch+ Help page](#). Any issues or queries related to InTouch+ can be addressed to InTouchPlus.Contact-Point@iaea.org.

Should online application submission not be possible, candidates may download the nomination form for the training course from the [IAEA website](#).

NOTE: A medical certificate signed by a registered medical practitioner dated not more than four months prior to starting date of the event must be submitted by candidates when applying for a) events with a duration exceeding one month, and/or b) all candidates over the age of 65 regardless of the event duration.

Administrative and Financial Arrangements

Nominating authorities will be informed in due course of the names of the candidates who have been selected and will at that time be informed of the procedure to be followed with regard to administrative and financial matters.

Selected participants will receive an allowance from the IAEA sufficient to cover their costs of lodging, daily subsistence and miscellaneous expenses. They will also receive either a round-trip air ticket based on the most direct and economical route between the airport nearest their residence and the airport nearest the duty station through the IAEA’s travel agency AX Travel Management, or a travel allowance, or they will be reimbursed travel by car/bus/train in accordance with IAEA rules for non-staff travel.

Disclaimer of Liability

The organizers of the event do not accept liability for the payment of any cost or compensation that may arise from damage to or loss of personal property, or from illness, injury, disability or death of a participant while he/she is travelling to and from or attending the course, and it is clearly understood that each Government, in approving his/her participation, undertakes responsibility for such coverage. Governments would be well advised to take out insurance against these risks.

Note for female participants

Any woman engaged by the IAEA for work or training should notify the IAEA on becoming aware that she is pregnant.

The Board of Governors of the IAEA approved new International Basic Safety Standards for Protection against Ionizing Radiation and for the Safety of Radiation Sources. The Standards deal specifically with the occupational exposure conditions of female workers by requiring, inter alia, that a female worker should, on becoming aware that she is pregnant, notify her employer in order that her working conditions may be modified, if necessary. This notification shall not be considered a reason to exclude her from work; however, her working conditions, with respect to occupational exposure shall be adapted with a view to ensuring that her embryo or foetus be afforded the same broad level of protection as required for members of the public.
